Module Aims

This module aims to give students an understanding of how marketing strategies are created and implemented in the digital age.

Learning Outcomes

A. Knowledge and understanding. Having successfully completed the module, you will be able to demonstrate knowledge and understanding of:

- the role of technology in providing insight into customer relationships, behaviour, and decision-making;
- ethical questions raised by these technologies, the concepts of social responsibility and sustainability;
- the criticality of the value proposition and the role of marketing in its communication and delivery;
- the cumulative contribution of digital age marketing gurus to current practice.
- the importance of digital technologies in establishing, evaluating and improving customer

satisfaction;

- the challenges and opportunities for traditional marketing in digital age organisations and markets;

B. Subject Specific Intellectual and Research Skills. Having successfully completed the module, you will be able to:

- understand courses of action based on a 'rational' and 'irrational' consumer behaviour profiles;
- evaluate conventional, digital, and alternative marketing strategies;
- evaluate and apply digital age marketing principles and techniques.
- formulate campaigns and strategies based on digital age perspectives;

C. Transferable and Generic Skills. Having successfully completed the module, you will be able to:

- critically analyse and evaluate marketing concepts;
- demonstrate effective oral and or written communications.

Module Overview

Marketing in the Digital Age focuses on the evolution of marketing in today's rapidly changing digital business environment. It examines how digital technologies have combined with advanced practitioner thinking to challenge and change the face of contemporary marketing theory and practice. The course specifically draws upon real cases and examples and is designed to give students a practical appreciation of cutting-edge practice.

Indicative Syllabus

Topics covered in this module will include:

- Introduction: Traditional Marketing vs. Digital Marketing

Assessment	Weighting	Word Count/Exam Duration
Individual Coursework	100	3000

Formative assignments

Formative assessment will be incorporated into the module through regular group activities, discussions, and mini-cases; immediate feedback will be provided to students. Students are also encouraged to discuss their coursework-related questions with the module leader in the Q&A sessions.

Additional Support and Resources

Study Skills and Language Support

Southampton Business School students can access a wide range of support to help you to develop study skills, improve your academic English and enhance your employability. For further information see: http://www.sbsaob.soton.ac.uk/study-skills-and-language-support/

Personal Academic Tutor (PAT)

The University operates a tutor system to help support and advise you in your academic study. All students on taught programmes (including online and distance learning students) should be allocated a Personal Academic Tutor from within their school or academic unit. The basic principles for the Personal Academic Tutoring system are as follows:
The Personal Academic Tutor role involves providing advice and support across your programme of study, and helping you review their wider academic progress. This role differs from that of lecturers and teaching staff, who support you on individual modules.

If you have any personal issues, your Personal Academic Tutors can advise you on the specialist support services the University offers.
You will meet your Personal Academic Tutor at key points in the academic year: at the beginning of Semester One, for instance, and then later in the academic year, in particular after assessment.

The University expects that you will engage with your Personal Academic Tutor, attend the scheduled meetings, respond to messages from your Personal Academic Tutor, and notify your Personal Academic Tutor (or Senior Tutor, if you prefer) if you are experiencing problems which are affecting your performance, attendance or progress in your studies.
In particular, you should contact your Personal Academic Tutor if you feel your performance in any forthcoming examinations will be affected by ill health or other special considerations, and check with your Personal Academic Tutor if you plan to cite him/her as a referee for job applications.
